Dr. Amy E. Gildemeister, Ph. D.
Director of Public Health

COVID-19 update 4/13/2020

We are sorry to share that one Schoharie County resident who was being treated for COVID-19 has now passed away. It is unknown at this time whether the official cause of death will be listed as COVID-19. Our sympathies go out to their family.

Three additional Schoharie County residents have confirmed cases of COVID-19, bringing the total number of Schoharie County residents to 20 (plus the additional case of a nonresident who works at SUNY). We have notified all individuals who were in close contact and have an elevated risk of contracting COVID-19. Of the 20 individuals who have tested positive for COVID-19 in Schoharie County, 4 are still in isolation, 15 have recovered and are off of isolation, and 1 individual is deceased. A total of 3 individuals have required hospitalization.

We are currently following 28 people that have been placed in isolation or quarantine by Schoharie County Department of Health. There is a total of 102 people who have completed their quarantine period and have been allowed to resume normal activities.

Note: Because Schoharie County residents sometimes receive testing and treatment at hospitals in nearby counties, the New York State COVID-19 dashboard may not reflect the current number of patients and deaths, as known by the local health department.

Dr. Amy E. Gildemeister, Ph.D.
