Full Environmental Assessment Form Part 1 - Project and Setting

Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the project sponsor to verify that the information contained in Part 1 is accurate and complete.

A. Project and Sponsor Information.

Name of Action or Project: A Local Law Adopting a New Town-Wide Zoning Law and Zoning Map		
Project Location (describe, and attach a general location map):		
Town of Schoharle, County of Schoharle, State of New York		
Brief Description of Proposed Action (include purpose or need):		
The action is consideration and adoption of proposed Introductory Local Law No. 3 of 2015 et and Zoning Map." In 2005 the Town adopted a comprehensive land use law to regulate struct to further the policies of the Town as set forth in the Town & Village of Schoharie Comprehen 2014, the 2005 land use law was annulled and set aside as a result of a procedural error. As The 1975 Zoning Ordinance does not contemplate, address or regulate many new technological general, the 1975 Zoning Ordinance is out of date, does not provide adequate safeguards implement the goals and objectives of the 1997 Comprehensive Plan. The Town Board now of a careful manner, the undertaking, establishment, siting, placement, construction, and implement the Village) through the adoption of a new comprehensive land use law.	ures and land uses in the Town. The sive Plan that was adopted in 1997. a result, the Town's 1975 Zoning Orc es and land uses that have become to ensure orderly growth in the Town desires to effectuate its Comprehens	2005 law was designed However on February 19, dinance is now in effect, prevalent in the region., and does not ive Plan and address, in

FULL ENVIRONMENTAL ASSESSMENT FORM ADDITIONAL INFORMATION

Brief Explanation:

The Full Environmental Assessment Form (FEAF) at section C.1. (page 2 of 13) asks if administrative or legislative adoption, or amendment of a plan, local law, ordinance, rule or regulation is the only approval which must be granted to enable the proposed action to proceed. In this matter, entitled "A Local Law Adopting a New Town-Wide Zoning Law and Zoning Map" the answer to this question is Yes. That is, no other approvals must be granted to adopt the local law. In that circumstance the LEAF directs that only sections C, F and G of the LEAF must be completed. Because the adoption of a town-wide zoning law is not a specific project, it is not necessary to complete LEAF sections D and E. See NYSDEC Publication: LEAF Workbook discussing Question C1. To provide additional information, this supplement is provided in response to LEAF section F.

Name of Action:

A Local Law Adopting a New Town-Wide Zoning Law and Zoning Map

SEQRA Status:

Type I

Description of Action:

The action is consideration and adoption of proposed Introductory Local Law No. 3 of 2015 entitled "A Local Law Adopting a New Town-Wide Zoning Law and Zoning Map." In 2005 the Town adopted a comprehensive land use law to regulate structures and land uses in the Town. The 2005 law was designed to further the policies of the Town as set forth in the Town & Village of Schoharie Comprehensive Plan that was adopted in 1997. However on February 19, 2014, the 2005 land use law was annulled and set aside as a result of a procedural error. As a result, the Town's 1975 Zoning Ordinance is now in effect. The 1975 Zoning Ordinance does not contemplate, address or regulate many new technologies and land uses that have become prevalent in the region. In general, the 1975 Zoning Ordinance is out of date, does not provide adequate safeguards to ensure orderly growth in the Town, and does not implement the goals and objectives of the 1997 Comprehensive Plan. The Town Board now desires to effectuate its Comprehensive Plan and address, in a careful manner, the undertaking, establishment, siting, placement, construction, and implementation of land uses and activities in the Town (outside of the Village) through the adoption of a new comprehensive land use law.

Background:

in 2005, after a lengthy period of drafting, review and deliberation, the Town adopted a comprehensive land use law (the "2005 Land Use Law") to regulate the location, design, construction, alteration, occupancy, and use of structures and the use of all land located within the municipal boundaries of the Town (outside of the Village of Schoharie). The 2005 Land Use Law repealed the 1975 Zoning Ordinance. The 2005 Land Use Law was designed to further the policies of the Town as set forth in the Town and Village of Schoharie Comprehensive Plan which was adopted in or about 1997. Its intent, among other things, was to regulate land uses in a manner that appropriately balanced the preservation

of the unique character and beauty of the Town while at the same time fostering economic opportunities.

By Decision and Order dated February 19, 2014, the Hon. Eugene P. Devine, J.S.C., County of Schoharie, annulled and set aside the 2005 Land Use Law, after finding the Town did not strictly adhere to the procedural requirements of the New York State Environmental Quality Review Act (SEQRA) when the law was adopted. As a result, the 2005 Land Use Law, and the post-adoption amendments thereto, including Local Law No. 2 of 2009 relating to Wind Energy Facilities and Local Law No. 3 of 2012 relating to Land Application Facilities, Natural Gas and/or Petroleum Exploration, Extraction or Production Wastes Disposal/Storage Facility, Natural Gas and/or Petroleum Exploration, Extraction or Production Wastes Dump, Natural Gas Compression Facility, Natural Gas Processing Facility, Underground Injection, or Underground Natural Gas Storage, are null and void.

Through the annulment of the 2005 Land Use Law, the Town's Amended Zoning Ordinance of 1975 (the "1975 Zoning Ordinance") is now in effect. The 1975 Zoning Ordinance was adopted over thirty (35) years ago and does not contemplate, address or regulate many new technologies and land uses that have become prevalent in the region and the State. In the same respect, use regulations included in the 1975 Zoning Ordinance are out of date and do not provide adequate safeguards to ensure certain non-residential uses are located and undertaken in a manner that will not result in a material adverse impact on the Town's built and natural environment.

The Town Board desires to effectuate its Comprehensive Plan and address, in a careful manner, the undertaking, establishment, siting, placement, construction, enlargement and erection of the non-residential land uses and activities within the scope of this Local Law on a comprehensive Town-wide basis, rather than on an ad hoc basis, and to adopt a new land use law that includes provisions to specifically regulate the same.

Proposed Introductory Local Law No. 3 of 2015:

The proposed local law builds on the 2005 Land Use Law that had been in effect in the Town from 2005 through 2014. Through a series of workshop meetings the Town Board reviewed the 2005 Land Use Law and its subsequent amendments and developed proposed revisions and new regulations that have been incorporated into the proposed local law. The intent is to regulate land uses in a manner that appropriately balances the preservation of the unique character and beauty of the Town while at the same time fostering economic opportunities.

The proposed land use law divides the Town into three main districts where new uses, not contemplated or specifically addressed under the 1975 Zoning Ordinance, would be allowed subject to a varying level of regulation that would take into account the nature and intensity of a particular use. The new districts included a Commercial District, Hamlet District and Rural-Agricultural District (which largely combined the areas that had previously been zoned "Residential" and "Agricultural" under the 1975 Zoning Ordinance). A description of the purpose of each district is included in the proposed local law. A proposed zoning map is appended to the local law and is referred to as Schedule C. The zoning districts

¹ The 1975 Zoning Ordinance included three different "Residential" districts: "Seasonal Residential" (RS), "Single-Family Residential" (R-1), and "Multi-Family Residential" R-2.

in the proposed local law were first adopted as part of the 2005 Land Use Law and were in effect from 2005 through 2014.

The land use law creates a review process of varying levels of scrutiny depending on the proposed use, its size, intensity and proposed location. A special use permit review and approval is required for uses that may create issues of compatibility with the surrounding area so as to warrant case by case evaluation necessary in order to adequately protect the environment and nearby properties. In the same respect, certain uses or development will require a site plan review and approval in order to minimize impacts on nearby areas and properties.

In addition to the supplemental regulations that would be applied to specified uses, the proposed local law re-introduces the concept of "Overlay Districts" to provide extra protections in designated areas identified as containing environmentally sensitive conditions. For example, the Town Board reestablished the "Barton Hill Overlay District" because of the sensitive nature of the karst areas² located in this area of the Town. More specifically, it was determined that ground water in these area was highly influenced by activities on the surface due to the nature of the underlying limestone rock. The proposed local law re-established an added layer or regulations and design standards in these designated area (appended to the proposed local law as Schedule B) so that water quality and quantity will not be adversely affected. The regulations incorporated in the proposed local law were first developed in partnership with the Schoharie County Planning Department and were in effect from 2005 through 2014.

In the same respect, a Floodplain overlay district was created to manage development in federally regulated floodplains and floodways. Additional review by the Town's Floodplain Administer is required, compliance with the Town's adopted Floodplain regulations, and compliance with additional design and performance standards established by the Town's Floodplain Administrator for all uses and structures proposed within these designated areas.

The proposed land use law also adopts a "floating zone" procedure for the review and approval of Planned Development Districts ("PDD") to properly accommodate a higher density of residential uses, mixed residential and commercial uses, specialty uses such as senior housing, large scale uses or light industrial uses. The creation of a PDD requires the adoption of a separate local law following a site-specific environmental review and establishment of a set of standards, guidelines and procedures that would be specifically applicable to that specific PDD. Site plan review is also required for the entire PDD, and individual uses proposed within the PDD. Each use that is proposed for the PDD subsequent to its establishment may be subject to additional review pursuant to the standards, guidelines and procedures established for such PDD.

General performance standards for non-residential uses applicable in all districts were developed regulating building design, lighting, landscaping, parking, utilities, signs, setbacks, and erosion and sediment control. Specific performance standards applicable to enumerated uses were also incorporated into the proposed land use law. These regulations further regulate where certain uses can be located. For example, the performance standards for telecommunications towers and antennas includes a "special geographic restriction on commercial towers and antennas" prohibiting towers at or above the 800 ft. contour line on Terrace Mountain (identified as a "significant scenic resource") and

² Karst areas defined as that portion of the Town underlain with cavernous limestone rock.

within the area on the south side of the mountain bounded by Schoharie Hill Road and Wetzel Hollow Road.

The Town Board and its consultants endeavored to develop appropriate standards and criteria for special use permit and site plan approval, and supplemental regulations that would be applicable to development occurring in environmentally "sensitive areas" including the Barton Hill Overlay District and established Floodplain. The availability of procedural safeguards, performance standards and overlay districts incorporated in the proposed local law provide adequate safeguards to ensure future development will not result in significant adverse impacts for the environment.

Development Patterns

Aside from some development in the existing industrial park and one small office for a doctor, there has been no commercial or industrial development in the Town in the past ten years.

Additional Land Uses under the Proposed Land Use Law

The proposed local law regulates several land uses that were not permitted under the 1975 Zoning Ordinance, including indoor recreation, indoor other (theater, music hall, etc.), manufacturing, tech/R&D, airport, community center, telecommunications, apartments/ multi-family, bar-nightclub, hotel/motel, office building and restaurant. Although these uses are prohibited under the 1975 Zoning Ordinance, they were permitted in designated zoning districts from 2005 through 2014 (the years the 2005 Land Use Law was in effect), subject to specified procedural safeguards, performance and design standards. These safeguards and standards have been incorporated into the proposed land use to minimize impacts on nearby areas, neighboring properties and environmental resources. The definitions of these and other land uses regulated under the land use law have also been redefined to provide more clarity to the public and Town officials who must administer and enforce the law.

Environmental Assessment - Additional Information:

1. Physical Features

Topography

The topography of Schoharie ranges from a low of 580 feet in the Schoharie Valley to over 2,000 feet at the top of Cotton Hill. Slopes in the southeastern portion of the Town are steep. The topography in the northeastern section is more gentle and regular than in the others, and here, most slopes are about 10% or less. The Terrace Mountain-Round Top area in the central portion of Town, has rough, irregular topography with most slopes greater than 20%. The highest elevations in this section are at Round Top, which reaches about 1,760 feet. The slopes along Cobleskill creek are irregular and hills range from 680 to 1,100 feet.

Route 30 follows the Schoharie Creek which bisects the Town. The Schoharie Creek drains north into the Mohawk River and is the major drainage system in Schoharie County. Two other major creeks, the Fox Creek and the Cobleskill Creek, have had a major influence on the drainage systems and topography in the Town.

Barton Hill is a plateau-like ridge and is significant to the Town and Village as both the location of important limestone features and as the watershed for the Village north and east of Barton Hill, rolling hills fall gently to the Mohawk River. Fox Creek cuts an almost vertical cliff along the southern edge of the plateau and the western edge slopes gently towards the Schoharie Creek.

Geology

Schoharie County is part of the glaciated Allegheny Plateau. The central and northeastern portions of the Town are an extension of the Helderberg escarpment and have significant limestone geology. The Barton Hill and Terrace Mountain areas hold numerous caves, sink holes, sinking streams, cracked limestone pavement and other karst features.

Once formed, complex systems of caves and inter-connected cracks and crevices carry fast moving water (called insurgencies). Surface water in these locations enters the ground directly with little filtering by soil. In Schoharie, limestone features are of particular importance because of the high dependence of ground water for drinking supplies. Any land use that contaminates the surface water in and around insurgencies has the potential to quickly pollute groundwater supplies.

Soils

The soil structure of Schoharie is complex with seven different soil associates found. These soils range from nearly level, deep, and well-drained, high lime soils to steep, moderately drained and strongly acid soils. Deposits of gravel, sand, and silt can be found along the banks and flats of the creeks.

According to the Schoharie County New York Soil Survey, the majority of soils found throughout the town show severe and severe-moderate limitations to development due to seasonal wetness, slow permeability, slopes, shallowness, or flooding.

The valley portions of Schoharie are dominated by agricultural and rural residential land uses. Valley soils are very fertile and well drained. Outside the valley, steep, forested slopes and plateaus are common.

Water Resources

The Barton Hill Watershed is entirely within the limestone terrain of the Town and extends into the adjacent Town of Wright. It is the principal source of water for the Village of Schoharie. Water comes from several springs in the watershed, but water from the Fox Creek is used in times of drought.

The streams and creeks of the Town of Schoharie have been classified by the New York State Department of Environmental Conservation according to their best and highest use. The main stem of the Schoharie Creek, as well as the Cobleskill Creek are classified as "C". This means that the highest and best use is for fishing and fish production. The Fox Creek is classified as "B" from the mouth of the creek to the bridge along Route 30 and as "A" upstream into the Town of Wright. Many of the small tributaries that feed into the Fox Creek are classified as "A" waters. The best usages of Class "B" waters are for recreation and fishing. These waters shall also be suitable for fish propagation and survival. "A" Class waters are as a source of drinking water as well as for recreation, fishing and fish propagation.

The other streams and tributaries in Schoharie are classified as C, Ct (trout streams) and D (best usage is for fishing). Class Ct, B, A, and AA streams are regulated by the Department of Environmental Conservation under Title 6, Chapter X. Any proposed work that could affect the quality of these streams needs permits before work can start. Although the Schoharie Creek has a classification of "C", it is considered a navigable river. This raises the classification standard to protected status, and thus would also require permits for activities that may impact this waterway.

The Town has several wetlands 12.4 acres or larger that are regulated by the New York State Department of Environmental Conservation. Smaller wetlands can also be found in the Town. All wetlands, regardless of their size are protected by the Federal Section 404 of the Clean Water Act and may require a permit for activities impacting these waterways.

2. Community Information

Data collected in recent years shows that the town population has not increased. When the Town completed its Comprehensive Plan in 1997, the estimated total Town population was 2,324 persons (exclusive of the Village of Schoharie). In comparison, the estimated 2010 population (most recent U.S. Census data) shows the Town population to be 2,283 persons. This represents a 2.4% decrease over roughly twenty years. The Comprehensive Plan envisioned a much steadier and predictable growth rate in both the Town and village in 1997. However that trend has not materialized, which is indicative of similar population trends in the County and region as a whole. As such, anticipated growth and accompanying development pressures caused by an increasing population in the Town have not been realized.

-3. Traffic and Transportation

The primary means of transportation in Schoharie is by roadway. There are four categories of roadways in Schoharie. Route I-88 is a limited access roadway designed for through travel with interchanges only at major arterials. In Schoharie there is an interchange at Route 30A. Arterial roadways accommodate both through traffic and access to homes and commercial developments. The arterials in Schoharie are State Route 30A, State Route 30, State Route 7, and State Route 443. This arterial system serves as the main thoroughfare in the Town. Collector roadways funnel traffic from residential and agricultural areas to the arterials. Some of the principal collector roads in Schoharie are Prospect Street/Rickard Hill Road, Barton Hill Road, Sodom Road, and Schoharie Hill Road. Residential and Local Streets provide access to residences and farms and generally have no through traffic.

In 1997, the Comprehensive Plan looked at five key road segments within the Town and provided the general Average Annual Daily Traffic (AADT) counts for those segments based on the New York State Department of Transportation's (DOT) most recent data (1994). In comparison, the DOT's more recent data (based on 2012 count surveys) found a modest 7.6% average increase in AADT for all five of the same road segments. In other words, all five of the road segments originally studied in the Comprehensive Plan experienced a slight increase in AADT volumes which is consistent with expected volume increases over a twenty-year period. This modest increase in AADT's does not in and of itself represent a significant increase in road usage in the Town and is more reflective of expected background increases that would normally be found in most communities similar to Schoharie over such a long period of time.

Public Services

Police services in areas of the Town outside the Village are handled by the State Police and Schoharie County Sheriff's Department. There are two volunteer fire departments in the Town of Schoharie: one is located in the Village (Schoharie Fire Department – Niagara Engine Company No. 6) and the other is in Central Bridge (Central Bridge Fire Department). The Scho-Wright Ambulance Service provides emergency services to the Town and the adjacent Town of Wright.

In general, Police, Fire, Ambulance Facilities, Public Park and Recreational Activities, Social and Educational Activities, Historical Attractions, Transportation and Special Districts figures relating to staffing and/or budgetary levels that have not changed substantially since the Comprehensive Plan was adopted in 1997. A review of recent emergency services (Fire & EMS) call data shows that call numbers in 2013 (91 calls) was almost the same as that reported in 2000 (97 calls).

Both the Village and Town are in the Schoharie Central School District. In 2014, there were 860 students enrolled in K-12 and 40 universal pre-kindergarten students attending classes through a campus with interconnected elementary school, junior/ senior high school and district office. UPK and K-6 students attend Schoharie Elementary School and students in grades 7-12 attend the Jr./Sr. High School. The school district has 6 administrators, 90 teachers, 34 professionals and 56 support staff.

5. Land Use

At the time the Comprehensive Plan was adopted, the single dominant land use in the Town was agriculture (41%), followed by vacant (28%) and residential (29%) uses. Data provided by the Schoharie County Planning Department collected in more recent years shows agricultural land uses currently account for about 36.2% of the Town's land acreage, residential uses account for about 33.1%, vacant land accounts for 26.4%, and commercial, industrial, community and public service uses account for 3.2% of the total acreage. There are four designated Agricultural District in the Town of Schoharie: Agricultural District Nos. 1, 5, 6 and 9.

Comparatively speaking, the data reveals that there is almost no tangible change in the current land use profiles across the Town from 1997 when the Comprehensive Plan was adopted to present. Agricultural uses are still by far the most dominant forms of land use in Schoharie, followed closely by residential (single-family, multiple-family & mobile homes), and vacant lands. The only land use sector that experienced a minor (1.2+/-%) increase was commercial/retail/industrial/public institutions.

In addition, a review of past (2005-present) and current Use Variances, Area Variances, Site Plan Review applications and Special Use Permit applications was conducted to see if new or emerging trends in land use conflicts were occurring across the community. What the data revealed was 29 Area Variances, 3 Use Variances and 12 Special Use Permits being granted in the last 9+ years. There were also 39 Site Plan review applications approved during this same time period, with the vast majority of those applications for subdivisions. This relatively low number of variances and special permits as well as minimal site plan applications for commercial projects for a municipality the size of Schoharie is indicative of a community that is not experiencing major land-use conflicts, or significant growth or development pressures.

6. Public Utilities

Central Bridge has a water distribution system and a protected watershed. A special district was formed, known as the Central Bridge Water district to serve users in this general area. All water supplies for the remainder of the Town are from private wells or springs.

The Central Bridge water distribution system includes two reservoirs just east of the hamlet. The original reservoir has a water capacity estimated at 23 million gallons and the second reservoir, built in 1908, has an estimated volume of 12 million gallons. A distribution system moves water from the reservoirs, through a hypochlorinator to a system of pipes within the hamlet.

There were no public sewers in the Town of Schoharie when the Comprehensive Plan was developed 1997. However, more recently public sewers have been installed to serve the Hamlet of Central Bridge. A special sewer district was formed that included parts of Schoharie and the adjacent Town of Esperance with a service area that covers the area north of Cobleskill Creek. For the remainder of the Town, sewage is treated through private, on-site sanitary septic systems.

Sanitary sewer facilities in the Village were installed in 1958. Neither the Hamlet of Central Bridge, nor the remainder of Town has public sewers. Sewage at these non-village locations is treated through private, on-site sanitary septic systems. Several major utility lines, including electric and gas, cross through the Town and Village as well.

7. Recreational Areas

There are three public parks in the area: Fox Creek Park, LaSalle Park, and the Central Bridge Recreational Area. Other recreational facilities include little league fields near the Fox Creek park and at the Central Bridge Recreational area; tennis and basketball courts; and a new playground at the Schoharie Central School.

8. Visual Resources

Schoharie's scenic beauty is tied to both its natural features such as cliffs, forested hills and valleys, and to its agricultural landscape. The Comprehensive Plan identifies several important scenic locations were identified. These include Routes 30, 443 and I-88 looking at terrace Mountain, Route 30 outside the Village towards Middleburgh, and Schoharie Hill. Other scenic locations such as Depot Lane, the Old Stone Fort Complex and the Lutheran Parsonage have high historical value to residents.

9. Significant Natural Communities

According to the NYSDEC Environmental Resource Mapper, there are no designated significant natural communities in the Town of Schoharie

10. Endangered or Threatened Species

According to the Fish and Wildlife Service website (http://www.fws.gov/northeast/nyfo/es/CoListCurrent.pdf) the federally listed endangered and threatened species in Schoharie County include:

Bald eagle Indiana bat Haliaeetus leucocephalus

Myotis sodalis

Delisted Endangered

According to F&WS, while Indiana bats were known to winter in Albany County, it is now believed they are likely extirpated or in such small numbers that it is unlikely that they would be present and impacted by any specific proposed projects in Albany, Rensselaer, Saratoga, Schenectady, and Schoharie Counties.

The endangered and threatened species listed in Schoharie County by New York State include:

Animals

Bald Eagle

Bicknell's Thrush

Eastern Small-footed Myotis

Henslow's Sparrow

Northern Harrier Peregrine Falcon

Timber Rattlesnake

Haliaeetus leucocephalus

Catharus bicknelli

Myotis leibii Ammodramus henslowii

Circus cyaneus

Falco peregrinus Crotalus horridus Threatened

11. Opportunities for hunting, trapping, fishing or shell fishing

Due to the abundant agricultural and undeveloped land, areas within the Town of Schoharie exist for hunting and trapping consistent with other rural communities. However, most of the land available for hunting and trapping is in private ownership and subject to permission by the landowner. Fishing opportunities exist in the various streams

12. Presence of Registered National Natural Landmarks

According to the National Park Service website (http://www.nature.nps.gov/nnl/state.cfm?State=NY), there are no registered National Natural Landmarks in Schoharie County.

13. Presence of Critical Environmental Areas

According to the NYSDEC website, there are no designated Critical Environmental Areas in the Town of Schoharie. See http://www.dec.ny.gov/permits/25148.html.

14. Presence of Designated River Corridors

According to the NYSDEC website, there are no designated river corridors under the Wild, Scenic and Recreational Rivers Program (6 NYCRR 666) in the Town of Schoharie. See http://www.dec.ny.gov/permits/32739.html.

15. Presence of Locations on the State or National Register of Historic Places

The National Register of Historic Places contains the following locations in the Town of Schoharie (see http://www.nationalregisterofhistoricplaces.com/ny/schoharie/state.html):

Becker Stone House, Murphy Road
Becker-Westfall House, NY Route 443
The Colyer House, 5729 NY Route 30
Christian Hess House and Shoemaker's Shop, 111 Stony Brook Road
Gallupville Methodist Church, Factory Street Schoharie
Sternbergh House, Oak Hill Road (150 Route 30A), Schoharie
Westheimer Site, address restricted
George Westinghouse, Jr., Birthplace and Boyhood Home, Westinghouse Road, Central Bridge

16. Presence of Officially Designated Scenic or Aesthetic Resource

There are no officially designated scenic or aesthetic resources in the Town of Schoharie.

17. Unique Geological Features

According to the NYSDEC Environmental Resource Mapper, the following are identified in the Town of Schoharie:

Terrace Mountain

Shows fine exposures of the gently dipping carbonate rocks. They look like typical Manlius & Coeymans, but are actually the Rondout & Cobleskill Formation.

Rickard Hill Road Multiple Outcrops; Helderberg Group; Fossiliferous: bryozoan, brachiopod, crinoid, echinoderm, sponges, tabulate coral, pelecypod, rare stromatoporoid; cephalopod

Full Environmental Assessment Form Part 2 - Identification of Potential Project Impacts

	Agency Use Only [If applicable]
Project:	
Date:	

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

1. Impact on Land Proposed action may involve construction on, or physical alteration of, the land surface of the proposed site. (See Part 1. D.1) If "Yes", answer questions a - j. If "No", move on to Section 2.	Žįvo		YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may involve construction on land where depth to water table is less than 3 feet.	E2d		
b. The proposed action may involve construction on slopes of 15% or greater.	E2f		
c. The proposed action may involve construction on land where bedrock is exposed, or generally within 5 feet of existing ground surface.	E2a		
d. The proposed action may involve the excavation and removal of more than 1,000 tons of natural material.	D2a		
e. The proposed action may involve construction that continues for more than one year or in multiple phases.	D1e		
f. The proposed action may result in increased erosion, whether from physical disturbance or vegetation removal (including from treatment by herbicides).	D2e, D2q		
g. The proposed action is, or may be, located within a Coastal Erosion hazard area.	B1i		
h. Other impacts:			

G 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1		•	
2. Impact on Geological Features The proposed action may result in the modification or destruction of, or inhibit access to, any unique or unusual land forms on the site (e.g., cliffs, dunes, minerals, fossils, caves). (See Part 1. E.2.g) If "Yes", answer questions a - c. If "No", move on to Section 3.	MNO		YES
If res, answer questions a - c. ij wo, more on to section 2.	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. Identify the specific land form(s) attached:	E2g		
b. The proposed action may affect or is adjacent to a geological feature listed as a registered National Natural Landmark. Specific feature:	Е3с		
c. Other impacts:			
3. Impacts on Surface Water The proposed action may affect one or more wetlands or other surface water bodies (e.g., streams, rivers, ponds or lakes). (See Part 1. D.2, E.2.h) If "Yes", answer questions a - l. If "No", move on to Section 4.	Дио		YES
ij Tes , disher questons 2 - 3	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may create a new water body.	D2b, D1h		
b. The proposed action may result in an increase or decrease of over 10% or more than a 10 acre increase or decrease in the surface area of any body of water.	D2b		
c. The proposed action may involve dredging more than 100 cubic yards of material from a wetland or water body.	D2a		
d. The proposed action may involve construction within or adjoining a freshwater or tidal wetland, or in the bed or banks of any other water body.	E2h		
e. The proposed action may create turbidity in a waterbody, either from upland erosion, runoff or by disturbing bottom sediments.	D2a, D2h		
f. The proposed action may include construction of one or more intake(s) for withdrawal of water from surface water.	D2c		
g. The proposed action may include construction of one or more outfall(s) for discharge of wastewater to surface water(s).	D2d	口	
h. The proposed action may cause soil erosion, or otherwise create a source of stormwater discharge that may lead to siltation or other degradation of receiving water bodies.	D2e		
i. The proposed action may affect the water quality of any water bodies within or downstream of the site of the proposed action.	E2h		
j. The proposed action may involve the application of pesticides or herbicides in or around any water body.	D2q, E2h		
k. The proposed action may require the construction of new, or expansion of existing, wastewater treatment facilities.	D1a, D2d		

1. Other impacts:			
4. Impact on groundwater The proposed action may result in new or additional use of ground water, or may have the potential to introduce contaminants to ground water or an aqui (See Part 1. D.2.a, D.2.c, D.2.d, D.2.p, D.2.q, D.2.t) If "Yes", answer questions a - h. If "No", move on to Section 5.	Per.		YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may require new water supply wells, or create additional demand on supplies from existing water supply wells.	D2c		
b. Water supply demand from the proposed action may exceed safe and sustainable withdrawal capacity rate of the local supply or aquifer. Cite Source:	D2c		
c. The proposed action may allow or result in residential uses in areas without water and sewer services.	D1a, D2c		
d. The proposed action may include or require wastewater discharged to groundwater.	D2d, E2l		
e. The proposed action may result in the construction of water supply wells in locations where groundwater is, or is suspected to be, contaminated.	D2c, E1f, E1g, E1h		
f. The proposed action may require the bulk storage of petroleum or chemical products over ground water or an aquifer.	D2p, E21		
g. The proposed action may involve the commercial application of pesticides within 100 feet of potable drinking water or irrigation sources.	E2h, D2q, E2l, D2c		
h. Other impacts:			
5. Impact on Flooding The proposed action may result in development on lands subject to flooding. (See Part 1. E.2) If "Yes", answer questions a - g. If "No", move on to Section 6.	MNO		YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may result in development in a designated floodway.	E2i		
b. The proposed action may result in development within a 100 year floodplain.	E2j		
c. The proposed action may result in development within a 500 year floodplain.	E2k		
d. The proposed action may result in, or require, modification of existing drainage patterns.	D2b, D2e		
e. The proposed action may change flood water flows that contribute to flooding.	D2b, E2i, E2j, E2k		
f. If there is a dam located on the site of the proposed action, is the dam in need of repair	Ele		

g. Other impacts:			
6. Impacts on Air The proposed action may include a state regulated air emission source. (See Part 1. D.2.f., D,2,h, D.2.g) If "Yes", answer questions a - f. If "No", move on to Section 7.	Ďίνο		YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. If the proposed action requires federal or state air emission permits, the action may also emit one or more greenhouse gases at or above the following levels: i. More than 1000 tons/year of carbon dioxide (CO ₂) ii. More than 3.5 tons/year of nitrous oxide (N ₂ O) iii. More than 1000 tons/year of carbon equivalent of perfluorocarbons (PFCs) iv. More than .045 tons/year of sulfur hexafluoride (SF ₆) v. More than 1000 tons/year of carbon dioxide equivalent of	D2g D2g D2g D2g D2g D2g	0000	
hydrochloroflourocarbons (HFCs) emissions vi. 43 tons/year or more of methane	D2h	.0	
b. The proposed action may generate 10 tons/year or more of any one designated hazardous air pollutant, or 25 tons/year or more of any combination of such hazardous air pollutants.	D2g		
c. The proposed action may require a state air registration, or may produce an emissions rate of total contaminants that may exceed 5 lbs. per hour, or may include a heat source capable of producing more than 10 million BTU's per hour.	D2f, D2g		
d. The proposed action may reach 50% of any of the thresholds in "a" through "c", above.	D2g		
e. The proposed action may result in the combustion or thermal treatment of more than 1 ton of refuse per hour.	D2s		
f. Other impacts:			
		· · · · · · · · · · · · · · · · · · ·	1
7. Impact on Plants and Animals The proposed action may result in a loss of flora or fauna. (See Part 1. E.2. r If "Yes", answer questions a - j. If "No", move on to Section 8.	mq.)	Mo	□YES
y les , unswer questions u - j. 1) 110 , more on to section o.	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may cause reduction in population or loss of individuals of any threatened or endangered species, as listed by New York State or the Federal government, that use the site, or are found on, over, or near the site.	E2o		
b. The proposed action may result in a reduction or degradation of any habitat used by any rare, threatened or endangered species, as listed by New York State or the federal government.	E20		
c. The proposed action may cause reduction in population, or loss of individuals, of any species of special concern or conservation need, as listed by New York State or the Federal government, that use the site, or are found on, over, or near the site.	E2p		
d. The proposed action may result in a reduction or degradation of any habitat used by any species of special concern and conservation need, as listed by New York State or the Federal government.	E2p		

e. The proposed action may diminish the capacity of a registered National Natural Landmark to support the biological community it was established to protect.	Е3с		
f. The proposed action may result in the removal of, or ground disturbance in, any portion of a designated significant natural community. Source:	E2n		
g. The proposed action may substantially interfere with nesting/breeding, foraging, or over-wintering habitat for the predominant species that occupy or use the project site.	E2m		
h. The proposed action requires the conversion of more than 10 acres of forest, grassland or any other regionally or locally important habitat. Habitat type & information source:	E1b		. 🗆
i. Proposed action (commercial, industrial or recreational projects, only) involves use of herbicides or pesticides.	D2q		
j. Other impacts:

b. The proposed action may occur wholly or partially within, or substantially contiguous to, an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory.	E3f		
c. The proposed action may occur wholly or partially within, or substantially contiguous to, an archaeological site not included on the NY SHPO inventory.	E3g		

d. Other impacts:			
e. If any of the above (a-d) are answered "Yes", continue with the following questions to help support conclusions in Part 3:			
 The proposed action may result in the destruction or alteration of all or part of the site or property. 	E3e, E3g, E3f		
 The proposed action may result in the alteration of the property's setting or integrity. 	E3e, E3f, E3g, E1a, E1b		
iii. The proposed action may result in the introduction of visual elements which are out of character with the site or property, or may alter its setting.	E3e, E3f, E3g, E3h, C2, C3		
 11. Impact on Open Space and Recreation The proposed action may result in a loss of recreational opportunities or a reduction of an open space resource as designated in any adopted municipal open space plan. (See Part 1. C.2.c, E.1.c., E.2.q.) If "Yes", answer questions a - e. If "No", go to Section 12. 	DNO) [YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may result in an impairment of natural functions, or "ecosystem services", provided by an undeveloped area, including but not limited to stormwater storage, nutrient cycling, wildlife habitat.	D2e, E1b E2h, E2m, E2o, E2n, E2p		
b. The proposed action may result in the loss of a current or future recreational resource.	C2a, E1c, C2c, E2q		
c. The proposed action may eliminate open space or recreational resource in an area with few such resources.	C2a, C2c E1c, E2q		
d. The proposed action may result in loss of an area now used informally by the community as an open space resource.	C2c, E1c		
e. Other impacts:			
12 Impact on Critical Environmental Avecs			
12. Impact on Critical Environmental Areas The proposed action may be located within or adjacent to a critical environmental area (CEA). (See Part 1. E.3.d) If "Yes", answer questions a - c. If "No", go to Section 13.	Ми	o 🗌	YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may result in a reduction in the quantity of the resource or characteristic which was the basis for designation of the CEA.	E3d		
b. The proposed action may result in a reduction in the quality of the resource or characteristic which was the basis for designation of the CEA.	E3d		
c. Other impacts:			

13. Impact on Transportation The proposed action may result in a change to existing transportation systems. (See Part 1. D.2.j)	Mo) <u> </u>	TES
If "Yes", answer questions a - g. If "No", go to Section 14.	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. Projected traffic increase may exceed capacity of existing road network.	D2j		
b. The proposed action may result in the construction of paved parking area for 500 or more vehicles.	D2j		
c. The proposed action will degrade existing transit access.	D2j		
d. The proposed action will degrade existing pedestrian or bicycle accommodations.	D2j		
e. The proposed action may alter the present pattern of movement of people or goods.	D2j		
f. Other impacts:			
14. Impact on Energy The proposed action may cause an increase in the use of any form of energy. (See Part 1. D.2.k)	Div	o 🔲	YES
If "Yes", answer questions a - e. If "No", go to Section 15.	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action will require a new, or an upgrade to an existing, substation.	D2k		
b. The proposed action will require the creation or extension of an energy transmission or supply system to serve more than 50 single or two-family residences or to serve a commercial or industrial use.	D1f, D1q, D2k	· 🗆	
c. The proposed action may utilize more than 2,500 MWhrs per year of electricity.	D2k		
d. The proposed action may involve heating and/or cooling of more than 100,000 square	D1g		
feet of building area when completed. e. Other Impacts:			
15. Impact on Noise, Odor, and Light The proposed action may result in an increase in noise, odors, or outdoor light (See Part 1. D.2.m., n., and o.)	nting. No	o 🗌	YES
If "Yes", answer questions a - f. If "No", go to Section 16.	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may produce sound above noise levels established by local regulation.	D2m		
b. The proposed action may result in blasting within 1,500 feet of any residence, hospital, school, licensed day care center, or nursing home.	D2m, E1d		
The proposed action may result in routine odors for more than one hour per day.	D2o	1 -	

d. The proposed action may result in light shining onto adjoining properties.	D2n		
e. The proposed action may result in lighting creating sky-glow brighter than existing area conditions.	D2n, E1a		
f. Other impacts:			
	,		
16. Impact on Human Health The proposed action may have an impact on human health from exposure to new or existing sources of contaminants. (See Part 1.D.2.q., E.1. d. f. g. an If "Yes", answer questions a - m. If "No", go to Section 17.	nd h.)) <u> </u>	YES
	Relevant Part I Question(s)	No,or small impact may cccur	Moderate to large impact may occur
a. The proposed action is located within 1500 feet of a school, hospital, licensed day care center, group home, nursing home or retirement community.	E1d		
b. The site of the proposed action is currently undergoing remediation.	Elg, Elh		. 🗆
c. There is a completed emergency spill remediation, or a completed environmental site remediation on, or adjacent to, the site of the proposed action.	Elg, Elh		
d. The site of the action is subject to an institutional control limiting the use of the property (e.g., easement or deed restriction).	Elg, Elh		
e. The proposed action may affect institutional control measures that were put in place to ensure that the site remains protective of the environment and human health.	Elg, Elh		
f. The proposed action has adequate control measures in place to ensure that future generation, treatment and/or disposal of hazardous wastes will be protective of the environment and human health.	D2t		
g. The proposed action involves construction or modification of a solid waste management facility.	D2q, E1f		
h. The proposed action may result in the unearthing of solid or hazardous waste.	D2q, E1f		
i. The proposed action may result in an increase in the rate of disposal, or processing, of solid waste.	D2r, D2s		
j. The proposed action may result in excavation or other disturbance within 2000 feet of a site used for the disposal of solid or hazardous waste.	Elf, Elg Elh	. 🗖	
k. The proposed action may result in the migration of explosive gases from a landfill site to adjacent off site structures.	Elf, Elg		
l. The proposed action may result in the release of contaminated leachate from the project site.	D2s, E1f, D2r		
m. Other impacts:		. 🗖	

17. Consistency with Community Plans The proposed action is not consistent with adopted land use plans. (See Part 1. C.1, C.2. and C.3.)	NO	Y	ES
If "Yes", answer questions a - h. If "No", go to Section 18.	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action's land use components may be different from, or in sharp contrast to, current surrounding land use pattern(s).	C2, C3, D1a E1a, E1b		
b. The proposed action will cause the permanent population of the city, town or village in which the project is located to grow by more than 5%.	C2		
c. The proposed action is inconsistent with local land use plans or zoning regulations.	C2, C2, C3		
d. The proposed action is inconsistent with any County plans, or other regional land use plans.	C2, C2		
e. The proposed action may cause a change in the density of development that is not supported by existing infrastructure or is distant from existing infrastructure.	C3, D1c, D1d, D1f, D1d, Elb		
f. The proposed action is located in an area characterized by low density development that will require new or expanded public infrastructure.	C4, D2c, D2d D2j		
g. The proposed action may induce secondary development impacts (e.g., residential or commercial development not included in the proposed action)	C2a		
h. Other:
